Marketing Bulletin

Ref: MB/03/003 – November 2003

Contact: Steve Clarke

General Statement on the Support for Trimetra UNIX and NT Subsystems (UNS)

Applies to the UK and Worldwide

Trimetra SY, LY, DY servers support OpenVME, Windows and UNIX. OpenVME runs on the OVS (OpenVME Subsystem) with Windows and UnixWare running on the UNS (UNIX or NT Subsystem).

This Marketing Bulletin announces the complete withdrawal of support for the UNS Subsystems on Trimetra SY, LY and DY servers.

Support for UNS systems will be withdrawn on the following dates:

	UNS 2.0	UNS 3.0	UNS 3.5
Trimetra SY	May 2004	November 2004	June 2005
Trimetra LY	May 2004	November 2004	November 2004
Trimetra DY	Not Fitted	March 2005	Not Fitted

Where there are existing contractual support commitments beyond the announced dates, Fujitsu will work with the customer and endeavour to honour those commitments. Fujitsu offer a full range of replacement products that will satisfy all customers' requirements.

Alternative Products

There is a range of replacement Intel-based servers, from Fujitsu and others, which will run Windows and UnixWare applications. However it is recommended that a technology upgrade to **Trimetra** NOVA is considered to take advantage of the cost and performance benefits of running on modern technology.

Further Information

If you require any further information, please contact Ask Fujitsu on +44 (0) 870 242 7998 or email askfujitsu@uk.fujitsu.com quoting reference number 1371.
